

ODI ANUNTELEMI OLUROTIMI

Software Engineering Student · Full-Stack Developer (in training)

Lokoja, Kogi State, Nigeria anuntelemio@gmail.com github.com/Anu-21-Odi

Software engineering undergraduate at Nile University with hands-on full-stack training from Brainpals Code Academy. Builds responsive, accessible web interfaces in vanilla JavaScript, HTML and CSS, and is expanding into backend development with Python, PHP and relational databases. Looking for an internship or junior role where the work is real and the feedback is fast.

EDUCATION

B.Sc. Software Engineering
Nile University

Expected 2028

EXPERIENCE

Software Engineering Intern
Brainpals Code Academy

Jul 6 — Sep 25, 2026

- Hands-on, practical full-stack web development training covering HTML, CSS and JavaScript.
- Gained foundational exposure to backend logic and data handling using Python and PHP.
- Applied debugging techniques, code structuring principles and Git version-control workflows in a team environment.

PROJECTS

SpendWise — Personal Finance & Expense Tracker
HTML5, CSS3, JavaScript

2026

- Designed and built the complete frontend for a budgeting application, including responsive layout structures.
- Implemented dynamic UI components in vanilla JavaScript to handle budget inputs and re-render state live as the user types.
- Structured the codebase for readability without a framework or build step.
- Roadmap:* secure backend (Python/PHP) with persistent database storage for user transactions.

TECHNICAL SKILLS

LANGUAGES	JavaScript (ES6+), Python, PHP, HTML5, CSS3
FRONTEND	Responsive web design, DOM manipulation, UI development, semantic HTML, Flexbox & Grid
BACKEND & DATA	Python, PHP, relational databases (fundamentals)
TOOLS	Git, GitHub, VS Code, Chrome DevTools
